## EDUCATION

### RP – KIGALI College

Advanced Diploma in Mechatronics Technology

### IPRC KIGALI /TSS

Diploma in Production and Manufacturing

Kigali, Rwanda

**January 2021 - May 2024**

Kigali, Rwanda

**January 2018 – November 2021**

---

## SKILLS SUMMARY

**Languages:** JavaScript, TypeScript, C, C++, SQL

**Frameworks:** React, NextJS, Angular, GraphQL

**Soft Skills:** Excellent communication, Problem solving, time management

**Backend:** Node.js, REST APIs, System Design, CI/CD, PostgreSQL

---

## WORK EXPERIENCE

### Software Engineer | AmaliTech gGmbH

**April 2025 - Present**

- ✓ Developed and maintained scalable web applications using Angular, TypeScript, and GraphQL in an agile team environment.
- ✓ Mentored and conducted mock interviews for trainee software engineers, focusing on technical and soft skills development.
- ✓ Collaborated with cross-functional and international teams to deliver high-quality software solutions aligned with client requirements.

### Full stack Web developer | WCT

**January 2024 - September 2024**

- ✓ Collaborated with cross-functional teams to develop e-commerce solutions, optimizing backend processes and integrating third-party APIs for payment and logistics systems.
- ✓ Conducted code reviews and implemented CI/CD pipelines, enhancing code quality and deployment efficiency by 30%
- ✓ Developed responsive frontends using HTML, CSS, and JavaScript frameworks, ensuring compatibility across multiple devices and browsers

### Frontend Web developer | Cover Soko

**September 2024 – January 2025**

- ✓ Developed and maintained responsive user interfaces using React, enhancing website performance and achieving a 20% increase in user engagement.
- ✓ Participated with UI/UX designer to implement functional, effective and efficient frontend designs
- ✓ Translated UI/UX designs from Figma into fully functional web pages with cross-browser compatibility.
- ✓ Optimized website performance by implementing best practices in HTML, CSS, and JavaScript, reducing page load times by 15%
- ✓ Collaborated with backend developers to integrate APIs and ensure seamless data flow between the frontend and backend.

---

## PROJECTS

### WCT Tourist Management Web app | WCT | [LINK](#)

**January 2024 - September 2024**

- ✓ Developed and deployed a dynamic web application for WCT that provides an online platform for booking tourism locations in Africa.
- ✓ Designed and implemented the frontend using React and responsive UI components, ensuring seamless user experiences across devices.

- ✓ Optimized app performance, reducing loading times by 20%.

### **Fintech Insurance Solution | Cover Soko | [LINK](#)**

**September 2024 – January 2025**

- ✓ Built an innovative online platform that enables users to buy insurance products with ease, transforming the traditional process into a fully digital experience.
- ✓ Streamlined user flows, reducing the time required to complete the insurance purchase process by 30%.

### **EKorana SMS | EKorana | [LINK](#)**

**January 2025 – May 2025**

- ✓ Built a bulk SMS sending platform designed to streamline mass messaging operations for businesses, featuring an API-based sending interface for programmatic integration.
  - ✓ Led the entire frontend development and contributed to system design architecture.
- 

## **CERTIFICATES**

### **AmaliTech Graduate Trainee Program**

**April 2025 - October 2025**

- ✓ Completed an intensive graduate trainee program covering software engineering best practices, professional development, and real-world project delivery within an agile team environment.

### **Andela Technical Leadership Program**

**December 2023 - December 2024**

- ✓ Successfully achieved technical certificate throughout one year period, mastering full stack web development, with MERN/PERN stack.
  - ✓ Mastered non-technical skills including communications, teamwork and problem-solving skills
-
